-----

Energy storage systems are an essential element of Latvia's path towards a sustainable and energy-independent future. The ...

The plans of the Group to invest in battery energy storage system technology by installing 250 MW of power with a capacity of 500 MWh by 2030 is an affirmation of the ...

Over the next five years, SNG Solar plans to build a solar power plant with a capacity of 100 MW on 1.77 million square meters, generating approximately 100,000 MWh of ...

This deal marks the beginning of a major solar energy project at the port of Riga, which will include the installation of solar panels, the production and storage of renewable ...

Backed by BlackRock's Diversified Infrastructure business, Jupiter Power has a strategic and established portfolio of utility-scale energy storage projects operating or in construction in the ...

The project provides for the installation of solar panels, renewable solar electricity production and storage, as well as hydrogen and alternative fuel production.

Let's face it - the sun doesn't always shine when we need electricity. That's where Riga Dingfu photovoltaic energy storage systems come in, acting like a solar-powered piggy ...

Its BESS assets will sit in a portfolio alongside hydro power plants (installed capacity ~1550 MW), combined heat and power plants (~1050 MW) and solar and wind ...

As we approach Q4 2025, Riga's storage capacity is projected to triple, potentially eliminating the need for

one natural gas peaker plant entirely. Now that's what we call powering progress!

Energy storage systems are an essential element of Latvia's path towards a sustainable and energy-independent future. The importance of these technologies is being ...

With a construction timeline set for five years, this ambitious plant will incorporate an extensive array of solar panels linked directly to a 110 kV power line. This infrastructure is ...
