-----

The project will be developed at Rome Fiumicino International airport and the energy stored will cover evening peak-demand, while also providing flexibility services to the grid.

The PIONEER project involves the design, construction, start-up and operation of a system made up of second-life batteries from the automotive sector for the storage of excess power ...

Europe's largest airport solar-battery integration, boosting energy resilience and circular economy leadership. Rome's Fiumicino International Airport has launched Pioneer, ...

Enel: Italy launches an innovative energy storage system at Rome's Fiumicino airport, utilizing old electric vehicle batteries to significantly reduce carbon emissions and store ...

Governor Hochul announced awards for 22 large-scale solar and energy storage projects that will deliver enough clean, affordable energy to power over 620,000 New York homes for at least ...

As part of the PIONEER project, a commercial use case for 2nd-life batteries in combination with a 30 MWp PV system to power the >>Leonardo da Vinci<< international airport in Rome ...

Rome's Fiumicino Airport now uses second-life EV batteries to store solar energy and cut 16,000 tons of CO2 over ten years.

Our strategy in this research seeks to transform solar (PV) power generation into a reliable and cost-efficient energy source available 24/7, 365 days a year. This method involves ...

Rome's shift toward renewable energy solutions like photovoltaic power generation and advanced energy

storage systems is reshaping its urban landscape. This article explores how solar ...

As part of the PIONEER project, a commercial use case for 2nd-life batteries in combination with a 30 MWp PV system to power the >>Leonardo da ...

The beneficiaries will be selected through a competitive, transparent, and non-discriminatory bidding process, where electricity storage developers will compete based on offers relating to ...
