What are solar energy ETFs?

Solar Energy ETFs invest in stocks of companies involved in providing goods and services exclusively to the solar energy industry. Click on the tabs below to see more information on Solar Energy ETFs, including historical performance, dividends, holdings, expense ratios, technical indicators, analysts reports and more.

Is solar energy UCITS a good ETF?

This ETF is for those excited about the future of solar power. Solar Energy UCITS is a European ETF solely focused on solar energy, focusing on companies and manufacturers who operate in the solar industry. This pure-play ETF is attractive for those who want to solely invest in solar energy and not other kinds of clean energy.

Which solar energy ETF should you buy?

Amongst all the other ETF options for solar power, RAYS is the one best positioned for growth, both from its holdings and strategy. It should be on your list of solar energy ETFs to buy. Their portfolio is primarily focused on emerging markets for solar power, such as the Chinese and Japanese markets.

How are solar energy ETFs ranked?

Solar Energy and all other industries are ranked based on their aggregate assets under management (AUM) for all the U.S.-listed ETFs that are classified by ETF Database as being mostly exposed to those respective industries. If an ETF's industry classification changes, it will affect the aggregate AUM calculations.
