Why is Ireland's solar sector thriving?

Ireland's solar sector is thriving, as the Scale of Solar report shows. This is proof of what we can achieve when government, industry and communities work together. That collaboration will be crucial as we move towards our climate goals and a more secure energy future. - Darragh O'Brien, Minister for Climate, Energy and the Environment 1.

Why should Ireland support energy storage?

By supporting energy storage Ireland can enable more renewable electricity on the grid, reduce our reliance on imported fossil fuels and our exposure to volatile gas commodity prices while significantly lowering our carbon emissions. November 2024

What is solar Ireland?

2025 marks a pivotal moment -- not just for solar, but for how we define its place in Ireland's energy future. This year, we became Solar Ireland, a name that reflects the evolution of our industry from advocacy to full-scale delivery.

Could energy storage transform Ireland's energy system?

If this pipeline was built out, the report states that Ireland could capture all of that wasted energy, further reducing our reliance on fossil fuels, and driving down energy costs for consumers. "Energy storage solutions can transform our electricity system for the better," said Bobby Smith, head of Energy Storage Ireland.

Lightsource BP will outline its proposal to fund, develop and build a 57MW solar and 54MW co-located energy storage installation at a community information event on 22 May ...

This brochure highlights the benefits that energy storage can bring to Ireland in terms of security of supply, electricity price reductions and renewable energy integration.

Every rooftop array, every solar farm is part of a bigger picture: creating clean energy now, while laying the foundation for a more resilient, affordable and sustainable future. We are, quite ...

Today's conference heard from a range of stakeholders across the renewable sector, discussing the potential role of energy storage in the Irish energy transition, and the ...

Looking ahead, the government plans to refine market mechanisms to sustain and expand energy storage capacity beyond 2030, ensuring that the grid's future needs are met ...

The Electricity Storage Policy Framework presents 10 government actions to support the role of electricity storage systems in Ireland's energy transition, identifying the key ...

Lightsource BP has proposed a significant 57MW solar and 54MW battery energy storage project in Carrickmacross, County Monaghan, Ireland. The company plans to outline ...

Ireland's energy storage could increase eightfold by 2035, according to a new report by Energy Storage Ireland. It states that battery storage has the potential to provide ...

Ireland's proposed iron-air battery storage project in Donegal represents a significant step forward in this journey, promising to make renewable energy sources like solar ...

Ireland's energy storage could increase eightfold by 2035, according to a new report by Energy Storage Ireland. It states that battery ...

In addition, both Lightsource bp and Terra Solar are planning to utilise storage systems in their solar farms in Ireland. Counties Cork, Meath, Kerry, and Offaly currently have ...
