-----

Discover how large energy users are turning to on-site power generation to offset rising capacity costs, improve reliability, and meet ...

The average U.S. construction costs for solar photovoltaic systems and wind turbines in 2022 were close to 2021 costs, while natural gas-fired electricity generators ...

These benchmarks help measure progress toward goals for reducing solar electricity costs and guide SETO research and development programs. ...

The average cost per unit of energy generated across the lifetime of a new power plant. This data is expressed in US dollars per kilowatt-hour. It is adjusted for inflation but does not account for ...

NLR's solar technology cost analysis examines the technology costs and supply chain issues for solar photovoltaic (PV) technologies. This work informs research and ...

Total installed costs for renewable power decreased by more than 10% for all technologies between 2023 and 2024, except for offshore wind, where they remained relatively stable, and ...

Discover why businesses are shifting to on-site power generation to improve energy reliability, reduce costs, and achieve sustainability goals.

A quick visual snapshot of how prices for different generating resources is expected to change in the coming decades.

These benchmarks help measure progress toward goals for reducing solar electricity costs and guide SETO
