The Major Solar Projects List is a database of all ground-mounted solar projects, 1 MW and above, that are either operating, under construction or under development.

Deciding where solar projects will be installed is one of the very first decisions to be made in a project development timeline. Explore the many factors to consider when selecting a site.

Solar energy is booming, and finding the best places for solar installations is crucial for maximizing its potential. In this article, we explore the top locations for solar energy ...

Top biggest solar PV stations in the United States 2024. (Updated September 2024) Get familiar with our list of the largest US-based solar photovoltaic plants ...

All large-scale solar energy facilities can now be found on a single map thanks to a collaboration between the U.S. Geological Survey and the U.S. Department of Energy's ...

Over 190,000 sites for solar, wind, biomass, and geothermal energy. Search data by attributes including state, acreage, renewable energy capacity, distance to nearest ...

Start exploring solar potential by clicking on the map. Select sites, draw rectangles or polygons by clicking the respective map controls. Calculate energy production for selected sites.

Based on interconnection data, this map represents the most comprehensive summary available of installed solar capacity and annual trends, including projects that did not receive State ...

Large-Scale Solar Photovoltaic Database provides the locations and array boundaries of U.S. photovoltaic facilities, with capacity of 1 megawatt or more.

In summary, the deployment of solar power generation sites occurs in various contexts worldwide, with a strong emphasis on leveraging local resources and capabilities. ...
