-----

The electrification of railway systems has seen significant advancements through the integration of Energy Storage Systems (ESSs) that capture and re-utilise energy during operations.

The European Investment Bank (EIB) has granted a loan of EUR260 million to Stockholm Exergi for the construction of Sweden's first large-scale bioenergy plant with carbon ...

Stockholm Exergi is building one of the world's largest facilities for capture and permanent storage of biogenic carbon dioxide, scheduled for completion late in 2028.

The report "New Scandinavian Railway - Oslo-Stockholm" provides detailed plans on how the project can be designed to maximize efficiency, ...

This review thoroughly describes the operational mechanisms and distinctive properties of energy storage technologies that can be integrated into railway systems.

As the world races toward decarbonization, Sweden's new energy storage technology is turning heads globally, blending Nordic pragmatism with breakthroughs that ...

- Alstom outlines five strategic initiatives to accelerate Sweden's sustainable rail infrastructure, aligning with climate goals and market demands. - Key projects include ERTMS ...

The report "New Scandinavian Railway - Oslo-Stockholm" provides detailed plans on how the project can be designed to maximise efficiency, sustainability, and passenger comfort.

Stockholm Exergi is building one of the world's largest facilities for capture and permanent storage of

biogenic carbon dioxide, ...

The report "New Scandinavian Railway - Oslo-Stockholm" provides detailed plans on how the project can be designed to maximize efficiency, sustainability, and passenger comfort.

This article provides a detailed review of onboard railway systems with energy storage devices. In-service trains as well as relevant prototypes are presented, and their characteristics are ...

A recent article published in Renewable and Sustainable Energy Reviews unpacks how energy storage can be strategically integrated into electric rail infrastructure to decrease ...
