In May, the country put its first large-scale sodium-ion battery energy storage station into operation. The country has shown that sodium batteries could still have a role to play in ...

In December, the Swedish Energy Agency awarded grants to four projects to support innovation in the fields of aerospace engineering, sodium-ion batteries, carbon dioxide ...

The Swedish sodium-ion battery developer Altris has entered into a strategic collaboration with Oscilion, a subsidiary of Scandinavian Astor Group AB, with the aim of offering the defense ...

Northvolt will finalize its first sodium battery prototypes for energy storage later this year before developing a production line for manufacturing. While sodium batteries store a ...

This project aims to study grid support and priming of renewable energy power production units through the usage of a novel environmental-friendly sodium-based battery storage, a Na-ion ...

InnoEnergy has supported Altris from its early stages because the company develops scalable, safe, and economically competitive sodium-ion batteries that can serve a ...

Swedish sodium-ion battery developer Altris will partner with Stockholm-based energy storage developer Polarium to develop and demonstrate an energy storage solution ...

In December, the Swedish Energy Agency awarded grants to four projects to support innovation in the fields of aerospace engineering, ...

Ligna Energy and Altris are developing the world's first ultrathin sodium-ion battery, produced in Sweden and

Swedish sodium ion energy storage project
