This project aims to upgrade, develop, and provide 7,600 base stations compliant with GSM/UMTS/LTE/5G standards for mobile communication networks in the country.

While Dushanbe was among the early adopters of 5G base stations back in 2020, full-scale commercial deployment is still pending. Operators currently offer limited 5G ...

In 5G 2025-2028, MegaFon Tajikistan plans to install approximately 200 5G base stations in large cities of the country and lay about 1000 km of fiber-optic lines.

Setting a DAS to any other type will restore the main tower and delete the individual DAS elements. CellMapper is a crowd-sourced cellular tower and coverage mapping service.

The deployment of the base stations is expected to have a transformative impact on mobile communications and fixed broadband networks throughout Tajikistan.

Tajikistan's communications regulator has begun working with several international companies to overhaul core infrastructure. The most notable conversation is happening with ...
