Did Iran restore internet service after a blackout?

Internet service was partially restored in Iran on Saturday, after Tehran imposed a blackout during its war with Israel, London-based online watchdog NetBlocks said. "Metrics show a partial restoration in internet connectivity in Iran after a ~62 hour government-imposed shutdown," NetBlocks posted on social media.

Did Iran restore internet connectivity after a 62 hour government shutdown?

"Metrics show a partial restoration in internet connectivity in Iran after a ~62 hour government-imposed shutdown," NetBlocks posted on social media. Internet service was partially restored in Iran on Saturday, after Tehran imposed a blackout during its war with Israel, London-based online watchdog NetBlocks said.

What happened to Internet connectivity in Iran?

Internet connectivity has been restored in Tehran after repeated Israeli war strikes had taken it out, Iran's communications minister said Wednesday. "With conditions returning to normal, the state of communication access has reverted to its previous state," Sattar Hashemi wrote in a post on X.

Are Israel's Air Force bombing targets in Iran causing internet disruptions?

Hours after Israel's Air Force bombed targets in Iran on June 13, escalating the shadow conflict between the two countries, the first reports of self-imposed internet disruptions inside Iran emerged.
