"China"s largest" integrated offshore photovoltaic (PV) demonstration project, combining solar power, hydrogen production and ...

On June 30, 2021, the world"s first intelligent overhead container delivery system (in a pilot phase) was put into operation at the automated terminal.

China Tower and Huawei conducted joint pilot verification in 2018 and found that the 5G Power solution could support effective 5G site deployment without changing the grid, power ...

"China"s largest" integrated offshore photovoltaic (PV) demonstration project, combining solar power, hydrogen production and refueling, and energy storage, has been ...

The world"s first hydrogen-powered 5G port in east China"s Qingdao city became operational on Thursday morning, with the new high-tech equipment allowing unmanned ...

It is also the first fully automated container terminal in Asia. The port has achieved productivity of 36.2 containers per ship per hour on average, peaking at 52.76 containers per hour, a ...

Shenzhen, China - Hytera, a leading global provider of professional communications technologies and solutions, provided ...

Additionally, it has advanced the "hydrogen benefits the public" technological demonstration project and built the world"s first smart eco-terminal employing hydrogen energy ...

The first 5G hydrogen energy solar container communication station inverter in China
