NYCIDA closed its largest battery energy storage project to date, the East River Energy Storage Project, located on an industrial site on the East River in Astoria, Queens. ...

New York City's largest battery storage facility will replace a natural gas peaker plant unit retiring in 2025.

Approval has been granted for construction of a large-scale battery energy storage system (BESS) at the site of an existing fossil fuel power plant in New York.

The project will help displace fossil fuel-fired generation when the demand for power is highest. The 100 MW East River Energy Storage System will hold enough electricity to power more ...

The facility will serve as a large-scale battery energy storage system capable of charging from, and discharging into, the New York power grid. When fully functional, the ...

Approval has been granted for construction of a large-scale battery energy storage system (BESS) at the site of an existing fossil fuel ...

A large lithium battery energy storage system operated by Key Capture Energy that can power 15,000 homes for two hours during outages or high demand sits surrounded by a fence in ...

In 2019, it was announced that a 316 MW battery storage system would be built at the Ravenswood Generating Station. The system would be the largest in New York state and ...

Plans were announced to transform the site of the old Arthur Kill Power Station on Staten Island into the city's largest battery storage facility. When complete, the 60-megawatt ...

Plans were announced to transform the site of the old Arthur Kill Power Station on Staten Island into the city's largest battery storage ...

In this paper, SGES refers to a type of energy storage where two energy storage platforms are established, and a unique solid energy storage medium is transported through ...

An innovative solution, tower energy storage intends to offer reliable power reinforcement by harnessing various energy sources, ...
