Will US blockade stop Venezuela's refining units?

Dec 31 (Reuters) - The accumulation of residual fuel inventories in Venezuela's onshore tanks is forcing state energy company PDVSA to resort to extreme solutions to avoid shutting down refining units, as a U.S. blockade stopping tankers that are under sanctions from entering and leaving the country cuts exports to a minimum, four sources said.

Why does Venezuela produce so much oil?

Because it mostly produces extra-heavy crude that needs to be diluted for transportation and processed in complex refineries, Venezuela also produces high volumes of residual fuel, particularly high-sulfur fuel oil, which is typically exported to Asia.

Why is the US pursuing a tanker seizure of Venezuelan oil?

The U.S. has continued pursuing tanker seizures after intercepting two fully loaded cargoes of Venezuelan crude earlier this month. Venezuela's oil exports in December fell to about half the 950,000 bpd they averaged in November, according to preliminary figures.

Summary: Discover how Venezuela's specialized liquid cooling outdoor cabinets enhance energy storage efficiency across telecom, renewable energy, and industrial sectors. Explore technical ...

Discover how modular energy storage containers are revolutionizing power management across industries in Caracas - and why global suppliers like EK SOLAR lead this transformation.

6Wresearch actively monitors the Venezuela Energy Storage System Market and publishes its comprehensive annual report, highlighting emerging trends, growth drivers, revenue analysis, ...

Venezuela curbs Orinoco output under US pressure Arabian Post Staff -Dubai Venezuela has begun shutting oil wells in its prolific Orinoco Belt after storage filled up and ...

U.S. sanctions are choking Venezuela's oil exports, forcing PDVSA to rely on onshore and floating storage as

residual fuel inventories climb and tanker movements stall.

The accumulation of residual fuel inventories in Venezuela's onshore tanks is forcing state energy company PDVSA to resort to extreme solutions to avoid shutting down refining ...

Venezuela's oil production remains steady despite a U.S. operation to capture President Maduro. While the port of La Guaira was damaged, oil exports were halved due to ...

Storage systems are fundamental to the future of renewable energy. They store electricity and make it available when there is greater need, acting as a balance between supply and demand ...

Summary: Venezuela is embracing lithium battery energy storage to stabilize its power grid and support renewable energy integration. This article explores the project's technical advantages, ...

Energy storage batteries are transforming how nations like Venezuela address power generation challenges. With abundant solar resources and growing renewable energy projects, advanced ...
