---

Vienna's largest community-funded solar power plant went into operation in Unterlaa in May 2020. Thousands of climate activists from Vienna and the surrounding region bought into the project ...

The new Tondach V11 roof tile was developed in cooperation with the renowned design studio F. Porsche and wienerberger in Austria and is a timeless design piece with a significant V ...

A new solar installation in Vienna combines clean energy production with sound insulation. The project shows how PV systems can tackle multiple urban challenges and improve life for locals.

Even Vienna's grand neo-Gothic City Hall quietly sports solar panels on its roof now (strategically placed so you can't see them from the street, preserving the old-world charm).

Together with colleagues here in Vienna and in our markets, we are creating the necessary framework conditions to successfully expand the solar power business. I was also ...

Austrian materials producer Wienerberger says its carbon-neutral concrete roof-tile factory in Hungary will "set a new standard across Europe". The EUR30m, 7,300-sq-m plant in ...

In addition to mandating solar panels and energy-efficient buildings, Vienna is now heating thousands of homes with geothermal energy instead of planet-heating natural gas.

Regulators believe the falling price of solar panels, which now cost less than half of what they did last year, will convince many more Austrians to start producing their own power, ...

The project was initially supposed to produce solar panels, but it transitioned to solar roof tiles under Tesla, which failed to become a ...
