As part of the agreement, LONGi will deliver 100 megawatts of its high-efficiency Hi-MO X10 and Hi-MO 7 PV modules to support ...

Recently, LONGi Green Energy Technology and Solarpro, a leading European PV and energy storage engineering contractor, signed a landmark cooperation agreement to ...

As part of the agreement, LONGi will deliver 100 megawatts of its high-efficiency Hi-MO X10 and Hi-MO 7 PV modules to support Rinergy's expanding network of installers and ...

An EU-funded project has developed a European version of high-efficiency, next-generation solar technology and a low-cost manufacturing process. The innovative solar cells could boost a ...

The project "HOPE" (High-efficiency Onshore PV module production in Europe) is now eligible for funding. Project HOPE involves the construction of an additional 3.5 gigawatts ...

With a 20 GW order reserve in place, LONGi Europe is scaling up its production and logistics capabilities to meet rising demand, ensuring timely delivery of modules for ...

The European HERCULES project targets the development of the next generation of photovoltaics in Europe in developing high efficiency solar cells and modules to reach a ...

HJT technology provides high performance and low degradation of the module, substantially improving the solar cell solution and guaranteeing long PV module life cycle. Total investment ...

and a low-cost manufacturing process. ...

HOPE involves the construction of an additional 3.5 gigawatts of production capacity for solar cells and solar modules by Meyer Burger in Germany and probably in Spain. ...

Solarpro says it is building a 450 MW solar power plant in northern Hungary using Longi modules.

Located near Leipzig, Germany, this landmark project collectively generates enough green electricity to power 200,000 households annually, translating into a reduction in ...
