Groundbreaking at South Brooklyn Marine Terminal to transform port into NYC offshore wind hub Offshore Wind Innovation Hub Announces 2024 ...

Skipjack Wind will be located 20 miles off the coast of the Delmarva peninsula. The project will generate 1GW of offshore wind energy, which is enough to power more than 300,000 homes.

This electricity is then transmitted onshore via transmission infrastructure and integrated into the grid to power homes, businesses, schools, and other end uses. These projects can be ...

This large-capacity, modular outdoor base station seamlessly integrates photovoltaic, wind power, and energy storage to provide a stable DC48V power supply and optical distribution.

A low-emissions facility with solar power and EV charging stations installed onsite, the port will provide onshore power and charging for the Empire Wind Service Operations ...

As a promising offshore multi-energy complementary system, wave-wind-solar-compressed air energy storage (WW-S-CAES) can not only solve the shortcomings of traditional offshore wind ...

As electricity demand rises, we're harnessing offshore wind to deliver clean, renewable energy to millions of homes statewide. NYSERDA is ...
