A standardized model is presented for evaluating the efficiency of spectral converters integrated into PV glass, systematically ...

A standardized model is presented for evaluating the efficiency of spectral converters integrated into PV glass, systematically assessing spectral absorption and ...

Zirconium oxide coatings present a critical solution across various manufacturing sectors, offering superior protection against wear, ...

Light Management in Organic Photovoltaics Processed in Ambient Conditions Using ZnO Nanowire and Antireflection Layer with Nanocone Array.

Zirconium oxide coatings present a critical solution across various manufacturing sectors, offering superior protection against wear, corrosion, and thermal stress. These specialized coatings ...

This chapter investigates down-converters based on rare earth (RE) ions in zirconium, barium, lanthanum, and aluminum (ZBLAN), glass ceramics and borate glasses. ...

This article reviews promising studies on the design, manufacturing, microstructure, properties, and applications of glass ...

Here, we show the development of refractory epitaxial hafnium nitride (HfN) and zirconium nitride (ZrN) thin films as excellent mirrors with a solar reflectivity of ~90.3% and an ...

One promising approach involves the application of antireflective coatings to the surface of the photovoltaic glass to improve its transmittance. However, balancing mechanical ...

In this paper we have described the development of stable TiO<sub>2</sub>-ZrO<sub>2</sub> nanocomposite sol compositions capable of producing highly transparent, protective and ...

This article reviews promising studies on the design, manufacturing, microstructure, properties, and applications of glass-ceramics containing ZrO<sub>2</sub> and relevant glass-ceramic ...

This study investigates the influence of substrate type on the structural, morphological, optical, and photocatalytic properties of zirconium-doped zinc oxide thin layers. ...
